Problem Statement

It is a hostel medicine management system that connects students with surplus medicines to those in need, reducing wastage and promoting sharing. It ensures easy access to essential medicines during non-pharmacy hours.

MEDIMATE HOSTEL AID

- Innovative healthcare solution for hostel students.
- Addresses the challenge of accessing essential medicines during non-pharmacy hours, especially at night.
- Leverages technology to create a supportive community within the hostel environment.

- Community Collaboration
- Improved accessibility
- Reducing Medicine Wastage
- Feedback And Reliability

Cost-Free Assistance:

- This project facilitates hostel students in listing surplus medicines, providing them to others in need without any monetary exchange.

Instant Connectivity:

- Needy students can quickly check the availability of required medicines within fellow hostel students, enabling rapid decision-making.

Usefulness:

- Connects students with surplus medicines, reducing wastage.
- Ensures easy access during non-pharmacy hours, fostering a culture of sharing.

Scope:

- Scalable model for broader healthcare challenges.
- Adaptable to various institutions, integrating educational components for lasting impact.

Long-Term Usefulness:

- Sustainable design with continuous adaptation.
- Community Involvement
- Responsible medicine management for a lasting positive impact on hostel healthcare.
